# PRESS RELEASE

# NOVEN TO PRESENT POSTER DATA AT THE AMERICAN ACADEMY OF CHILD AND ADOLESCENT PSYCHIATRY (AACAP) AND CANADIAN ACADEMY OF CHILD AND ADOLESCENT PSYCHIATRY (CACAP) CONFERENCE

-The company will present data regarding wear-times for its dextroamphetamine transdermal system (d-ATS) for the treatment of Attention-Deficit/Hyperactivity Disorder (ADHD) -

October 11, 2022 – Miami, FL and Jersey City, NJ – Noven Pharmaceuticals, Inc., ("Noven") a whollyowned subsidiary of Hisamitsu Pharmaceutical Co., Inc. focusing on the development of transdermal therapy, today announced that it will present poster data related to its dextroamphetamine transdermal system (d-ATS) for the treatment of Attention-Deficit/Hyperactivity Disorder (ADHD) at the annual American Academy of Child and Adolescent Psychiatry (AACAP) and Canadian Academy of Child and Adolescent Psychiatry (CACAP) conference October 17-22, 2022.

"Our data suggests that controlling exposure via a transdermal patch may give patients the flexibility they need for their ADHD treatment," said poster presenter, Suzanne Meeves, Director of Clinical Development at Noven Pharmaceuticals, Inc.

Information for the upcoming session is listed below:

- Poster Title: Population Pharmacokinetic-Pharmacodynamic Modeling of Variable Wear Times for a Dextroamphetamine Transdermal System
- Session: New Research Poster Session 3
- Date: Friday, October 21<sup>st</sup>
  Time: 11:00 AM 1:00 PM ET
- Poster: 40685

"Neuro-diverse individuals with ADHD sometimes struggle with day-to-day tasks like balancing their schedules, and there is a need for more clinical options for this group of individuals," said Joel Lippman, M.D., Chief Operating Officer and Chief Medical Officer, Noven Pharmaceuticals, Inc. "As the developers of the first dextroamphetamine transdermal patch approved for ADHD in the U.S., we can help support this patient community by offering a new treatment option that may fit into their lives in a way that is right for each individual."

Approved this year by the FDA for Adults and Children with ADHD ages six and older, Noven's d-ATS system will be available in Q1 2023 for prescription under the brand name XELSTRYM<sup>™</sup>. Visit https://www.xelstrym.com/ to learn more and register for future updates.

**About Attention Deficit Hyperactivity Disorder (ADHD)** 

ADHD is one of the most common neurodevelopmental disorders of childhood. It is usually first diagnosed in childhood and often lasts into adulthood. Children with ADHD may have trouble paying attention, controlling impulsive behaviors (may act without thinking about what the result will be), or be overly active. ADHD can last into adulthood. Some adults have ADHD but have never been diagnosed. The symptoms can cause difficulty at work, at home, or with relationships. Symptoms can become more severe when the demands of adulthood increase and may look different at older ages, for example, hyperactivity may appear as extreme restlessness.

### About XELSTRYM™

XELSTRYM is the first and only FDA-approved, once-daily amphetamine transdermal patch for the treatment of Attention-Deficit/Hyperactivity Disorder (ADHD) in adults and pediatric patients 6 years and older. XELSTRYM should be applied 2 hours before an effect is needed and removed within 9 hours after application.

#### IMPORTANT SAFETY INFORMATION

### What is XELSTRYM?

XELSTRYM is a central nervous system stimulant prescription medicine used for the treatment of Attention-Deficit/Hyperactivity Disorder (ADHD) in adults and children 6 years and older. It is not known if XELSTRYM is safe and effective in children younger than 6 years of age.

# **IMPORTANT SAFETY INFORMATION**

Abuse and dependence: XELSTRYM, other amphetamine-containing medicines, and methylphenidate have a high chance for abuse and can cause physical and psychological dependence. Your healthcare provider (HCP) should check you or your child for signs of abuse and dependence before and during treatment with XELSTRYM.

- Tell your HCP if you or your child has ever abused or been dependent on alcohol, prescription medicines or street drugs.
- Your HCP can tell you how physical and psychological dependence and drug addiction are different.

**XELSTRYM** is a federally controlled substance (CII) because it contains amphetamine that can be a target for people who abuse prescription medicines or street drugs. Keep XELSTRYM in a safe place to protect it from theft. Never sell or give your XELSTRYM to anyone else because it may cause death or harm to them and it is against the law.

# Do not use XELSTRYM if you or your child are:

- Allergic to amphetamine or any of the ingredients in XELSTRYM. See the end of the Medication Guide for a complete list of ingredients in XELSTRYM.
- Taking or have taken within the past 14 days a medicine called a monoamine oxidase inhibitor (MAOI), including the antibiotic linezolid or the intravenous medicine called methylene blue.

# **XELSTRYM** can cause serious side effects, including:

Heart-related problems, including:

- o sudden death, stroke, and heart attack in adults
- o sudden death in children who have heart problems or heart defects
- o increased blood pressure and heart rate

Your HCP should check you or your child carefully for heart problems before starting treatment with XELSTRYM. Tell your HCP if you or your child have any heart problems, heart defects, high blood pressure, or a family history of these problems. Your HCP should check your or your child's blood pressure and heart rate regularly during treatment with XELSTRYM. Call your HCP or go to the nearest hospital emergency room right away if you or your child have any signs of heart problems such as chest pain, shortness of breath, or fainting during treatment with XELSTRYM.

- Mental (psychiatric) problems, including: new or worse behavior and thought problems, new or worse bipolar illness, new psychotic symptoms (such as hearing voices, or seeing or believing things that are not real) or new manic symptoms. Tell your HCP about any mental problems you or your child have or about a family history of suicide, bipolar illness, or depression. Call your HCP right away if you or your child have any new or worsening mental symptoms or problems during treatment with XELSTRYM, especially hearing, seeing or believing things that are not real, or new manic symptoms.
- Slowing of growth (height or weight) in children. Children should have their height and weight checked often while on XELSTRYM. Your HCP may stop treatment with XELSTRYM if your child is not growing or gaining height or weight as expected.
- Circulation problems in fingers and toes (peripheral vasculopathy, including Raynaud's phenomenon): fingers or toes may feel numb, cool, painful, fingers or toes may change color from pale, to blue, to red. Tell your HCP if you or your child has any numbness, pain, skin color change, or sensitivity to temperature in your fingers or toes.
   Call your HCP right away if you or your child have any signs of unexplained wounds appearing on fingers or toes while using XELSTRYM.
- Serotonin syndrome: symptoms such as agitation, fast heartbeat, flushing, seizures, coma, sweating, loss of coordination, confusion, dizziness, tremors, stiff muscles, muscle twitching, seeing or hearing things that are not real (hallucinations), changes in blood pressure, high body temperature (hyperthermia), nausea, vomiting, or diarrhea may occur Stop using XELSTRYM and call your HCP or go to the emergency room if symptoms occur. Serotonin syndrome may occur if XELSTRYM is taken with certain medicines and may be lifethreatening.
- Allergic skin rash (contact sensitization): Stop using XELSTRYM and tell your HCP right away if you or your child develop swelling or blisters at or around the application site.
- Application site reactions have happened while wearing XELSTRYM and after removal of the patch. Symptoms include pain, itching, burning feeling, redness, discomfort, or swelling at the application site. Call your HCP if you or child develop any application site reactions that do not resolve on their own.

## Before taking XELSTRYM tell your healthcare provider if you:

- Are pregnant or plan to become pregnant. It is not known if XELSTRYM may harm your unborn baby.
- Are breastfeeding or plan to breastfeed. XELSTRYM can pass into your milk. Do not breastfeed
  while taking XELSTRYM. Talk to your doctor about the best way to feed your baby if you take
  XELSTRYM.

# What should I avoid while using XELSTRYM?

- Do not drive, operate heavy machinery, or do other potentially dangerous activities until you know how XELSTRYM affects you.
- Avoid exposing the application site to direct external heat sources such as hair dryers, heating pads, electric blankets, heat lamps, saunas, hot tubs, and heated water beds as exposure to heat can cause too much medicine to pass into your body and cause serious side effects.

# What are the possible side effects of XELSTRYM?

- The most common side effects of XELSTRYM include:
  - decreased appetite
  - o headache
  - o trouble sleeping
  - o stomach pain
  - o nausea
  - increased blood pressure
  - muscle twitching (tics)
  - vomiting
  - o irritability
  - increased heart rate

Please read the Medication Guide and Full Prescribing Information including the Boxed Warning.

To report suspected Adverse Reactions, contact Noven at 1-800-455-8070 or FDA at 1-800-FDA-1088 or <a href="https://www.fda.gov/medwatch">www.fda.gov/medwatch</a>.

There is a pregnancy registry for women who are exposed to XELSTRYM during pregnancy. The purpose of the registry is to collect information about the health of women exposed to XELSTRYM and their baby. If you or your child becomes pregnant during treatment with XELSTRYM, talk to your HCP about registering with the National Pregnancy Registry for Psychiatric Medications at 1-866-961-2388 or visit online at <a href="https://womensmentalhealth.org/clinical-and-research-programs/pregnancyregistry/othermedications/">https://womensmentalhealth.org/clinical-and-research-programs/pregnancyregistry/othermedications/</a>
